

Installation Instructions:

NOTE: SHOK-BUFF buffers are recommended for full-size (5" barrel) 1911's only. Due to space constraints, we do not recommend their use in compact (less than 5" barrel) 1911's.

Disassemble slide assembly; remove recoil spring from recoil spring guide. Slide SHOK-BUFF (flat side first) on recoil spring guide, aligning it with corresponding shape of recoil spring guide, install recoil spring as usual. Reassemble pistol as normal.

NOTE: We recommend that you change the SHOK-BUFF every 1,000 rounds with standard loads. SHOK-BUFFS may require replacement more often with hardball or hotter loads.
